

YOU CAN GET MONTHLY DELIVERIES

SAFECOR HEALTH

With a little planning, monthly deliveries of syringes are within reach.

We know how important consistency is when it comes to keeping your patients supplied. With a little planning and regular ordering, you **can** receive your medicines on a true monthly schedule.

Here's how it works:

1

Start your first order

Place an initial 45-day par-level order to start the process. *Schedule monthly shipments from your wholesaler if possible.*

2

Keep ordering monthly

While that first order is in transit, continue submitting an order every month. This step establishes the ongoing delivery cadence.

3

Your schedule locks in

In about a month, your first order arrives — and every order you placed after that will follow, one month at a time.

4

Stay consistent

Continue placing monthly orders, and you'll continue receiving monthly deliveries.
