

YOU CAN GET WEEKLY DELIVERIES

SAFECOR HEALTH

With a little planning, weekly deliveries of oral solids are within reach.

We know how important consistency is when it comes to keeping your patients supplied. With a little planning and regular ordering, you can receive your medicines on a true weekly schedule.

Here's how it works:

- 1 Start your first weekly order**
 Place an order for your oral solids to begin the process. *Schedule weekly shipments from your wholesaler if possible.*
- 2 Keep ordering weekly**
 While that first order is in transit, continue submitting an order every week. This step establishes the ongoing delivery cadence.
- 3 Your schedule locks in**
 In about 2-3 weeks, your first order arrives — and every order you placed after that will follow, one week at a time.
- 4 Stay consistent**
 Continue placing weekly orders, and you'll continue receiving weekly deliveries.
